

**The Faculty of Science  
of the University of Fribourg/Switzerland  
(Department of Chemistry)**

invites applications for a tenured position of an

**Associate Professor in  
Physical Chemistry**

We seek an established scholar with a record of excellence in research and teaching, along with a demonstrated track record of extramural funding and successful mentoring of graduate research. Applications are welcomed in all areas of **experimental physical chemistry**, preferably in relation to the departmental focus on materials science and/or computational chemistry. The new professor will teach Bachelor courses (in French or German) as well as Master level courses (in English), and maintain an active research programme.

The closing date for applications is October 31, 2013, the position starts in September 2014. More information is available at [www.unifr.ch/science/positions](http://www.unifr.ch/science/positions).
